

Working together to sustain real improvements in both the care of our patients and our working lives
Your Care In Our Hands

EAST and SOUTH KNOWSLEY PRIMARY CARE NETWORK

PCNs use a collaborative team approach to provide care for patients and to coordinate primary health care services. They are a way to provide support for doctors by bringing teams of health professionals together, creating a Patient's Medical Home

Our Values

Safe

We will work in close collaboration based on accountability, integrity and respect, trusting each other to do a good job and honour commitments.

Effective

We will provide care and support that will achieve the best possible outcomes based on the most effective use of our resources and the best practice

Caring

We will listen to and respect our patients and each other and ensure we act with insight, understanding and compassion.

Responsiveness

We will respond to patients, colleagues and commissioners in a timely and flexible manner, taking responsibility and communicating effectively.

Well-Led

We will always take a measured, balanced and open approach, demonstrating high standards and being open to feedback and owning up to mistakes.
